DETAILED ACTION

1. This Supplemental Notice of Allowability supersedes previous Office Actions mailed on 02/22/2008 and 06/12/2008.

Original claim 23 was canceled by mistake. Claim 23 is allowed. This office action supersedes the previous one and corrects the claim set.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Norman P. Soloway, Registration number 24,315, on 02/19/2008.

The application has been amended as follows:

In the claims:

i. **Claims 1-6, 9, 11-22, 29, 31, 32 have been canceled** for being drawn to non-elected invention(s). Applicant(s) have the right to file divisional application(s) on subject matter covered by these claims.

ii. Claim 24 has been amended and rewritten as followed:

24. A method for processing signals from light detectors as claimed in claim 7, including an amplifier for amplifying signals from the light detectors, which comprises

Art Unit: 2877

employing a signal processing algorithm on the signals from said light detectors, to detect blood constituents.

Allowable Subject Matter

4. **Claims 7-8, 10, 23-28, 30, 33-43 are allowed.**

5. The allowable Subject matter was indicated in office Action mailed on 08/17/2007.

The following is a statement of reasons for the indication of allowable subject matter: No prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claim 7.

As claim 7, the prior art of record taken alone or in combination, fails to disclose or render obvious “a first set of light emitters are arranged as an array encircling the elongated vessel or tubing a longitudinal location along the vessel or tubing, and at least a second set light detectors are arranged as arrays encircling the elongated vessel or tubing at a longitudinally different location along the vessel or tubing” in combination with the rest of the limitations of claim 7.

The dependent claims 8, 10, 23-28, 30, 33-43 are allowed by virtue of their dependence upon claim 7.
